## Welcome to the latest GreenTek Catalogue of Innovative Turfcare Equipment!

This range of largely British built equipment has been transforming the quality of sports turf for decades. It is the result of working with greenkeepers and groundsman, to find exciting new ways of helping them produce the most healthy and high quality playing surfaces possible.

Please have a good read now, and also use the QR codes below to take you direct to some of the most interesting areas of our website. **Enjoy!**

Where you can see all the latest posts and short videos about GreenTek users and their equipment in action.

Where you can watch the full range of videos and find out exactly what benefits you can bring to your turf with each piece of equipment

© Greentek Solutions Ltd 2022

# Our Money-Back Promise

“We guarantee that every GreenTek turf maintenance product will do exactly what our literature claims – otherwise we will collect it and refund your payment 100% in full, right up to 12 months after purchase!”

## 5 Year Warranty

All GreenTek turfcare machinery is covered by a **FREE 5 Years Parts And Labour Warranty** for commercial use, and 3 months warranty for hire use. This is a genuine ‘bumper to bumper’ warranty and includes everything except components subject to fair wear and tear such as blades, brushes, belts, bearings, drive splines etc and damage caused by corrosion, abuse or lack of maintenance.

## Put fresh life into your greens

If your greens are slowly filling up with Poa Annua, when really you are wanting to increase the percentage of bent and fescue in them, here's the easy way to do it. Simply Dyna-Seed them.

Overseeding is like a blood transfusion that puts fresh vigorous new growth into your turf. The problem that greenkeepers usually face with overseeding is that their members object to the disruption, so they have to wait till too late in the year when the warmth has gone out of the soil, and then they don't get proper germination. This is a huge waste of expensive seed.

The new Dyna-Seeder units open up a totally different opportunity. Because they fit so discreetly on your triple mower, your members won't even notice what you are doing, thus letting you do it when the soil is warm. Their super precise mechanism can plant pure bent seed at just 5g per metre, accurately and without wind drift.

Special trolleys store the Dynamics units when not in use, and enable them to be fitted to the mower with ease.

## How the revolutionary Dyna-Seeder works...

The vibra-spiker mechanism vibrates the spikes into the ground which produces thousands of clean open holes for the seed to lodge and germinate in.

At the same time the seed is precisely metered out onto the green at the most economical application rate and pushed into the ground by the rotating spikes as they penetrate.

The precision seeding mechanism has a wide range of pre-set application rates which will handle bent seeds, fescue seeds and mixtures. Even pure bent can now be accurately and economically sown, without wind drift.

Enjoy the excellent germination rate, and fresh dense growth on your greens!

*“Fescue seeds clearly in the holes made - saved about 2/3 normal amount of seed”*

*“80% germination of Bent seed after 2 weeks”*

# Fast micro coring with your greens triplex mower

*Now that is revolutionary!*  
A greenkeepers' dream!

Hollow coring using a triplex, so quick and clean that the members will hardly notice it being done.

The Dyna-Corer's micro tines effectively remove thousands of tiny core plugs. An ideal thatch control or pre-seeding treatment. The coring depth can be precisely adjusted down to a maximum of 25mm.

Interchangeable solid tines are also available, plus NEW cross tines.

***“One of those pieces of equipment that comes available every few years and is “Wow!” and it changes the way you maintain your greens.”***

Ask for a  
**FREE  
DEMO**

## TINE OPTIONS

- Hollow Core Tines
- Solid Tines
- Needle Tines
- Cross Tines

## Solutions...

- Relieves surface compaction
- Prevents surface sealing to enable air and water to reach the root zone
- Effective thatch removal in dry weather without risk of cracking from deep grooving
- Excellent preparation before seeding
- Exceptionally smooth and quiet in operation

The side-ejection tines remove thousands of neat cores.

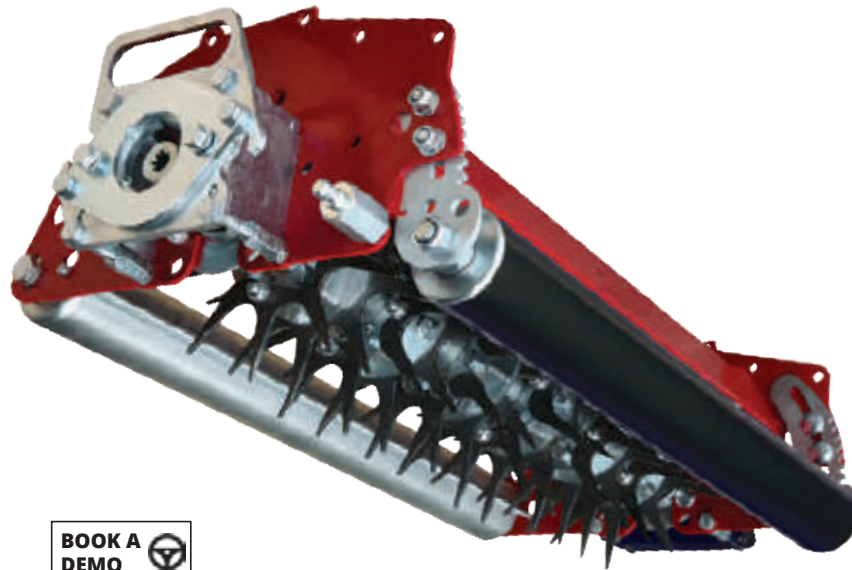

The discreet way to micro core your greens without your members noticing or objecting – do it with your greensmower!

**GreenTek®**

# Dyna-Spiker

## Solutions...

- Penetrates when the ground is too hard for even Sarel Rollers to have an effect
- Allows air, water, wetting agents and fertiliser to revitalise the roots and keep the turf healthy
- Can be used any time of year with minimum disturbance

## Powered spiker & slicer

Similar to a Sarel Roller, but utilising a patented powered vibration principle, the Dyna-Spiker drives its spikes deeper into the root zone, and opens up a longer slit.

When golf greens become hard in summer drought conditions, the Dyna-Spiker's vibratory spiking action is the solution, powering its spikes through the hard surface and deep into the root zone.

These versatile units provide you with an effective means of opening up parched greens to enable irrigation, wetting agent or fertiliser to penetrate.

This machine is an exceedingly versatile item of aeration equipment that you can use all season long, giving you excellent value for money.

“Wow - there is absolutely no disturbance!”

“Nothing else penetrates as deep without using a tractor mounted implement.”

The Dyna-Spiker produces neat deep slits and an undisturbed surface.

## Contra-rotating brush units

These units incorporate a reverse drive gearbox so that the brushes rotate the opposite way to the direction of travel. This gives the brushes superior performance for cleaning out debris from within the turf surface, and stimulates a healthy erect sward. The Dyna-Brush units are the ideal partners for the Dyna-Corers for golf courses that want perfectly clean greens in the minimum time and with no disruption or disturbance.

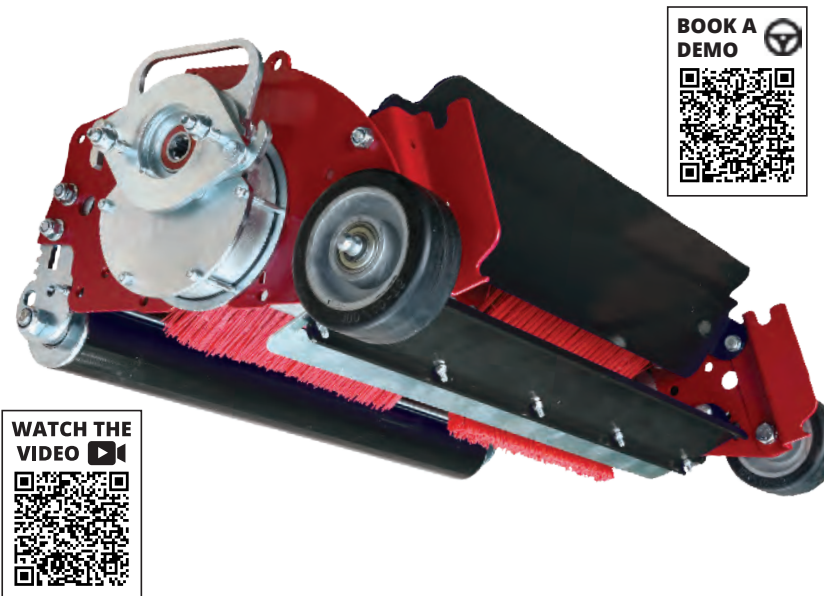

*“Very impressed with the Dyna Brush - it worked wonders, standing up the grass and cleaning out the sward.”*

*“They collected the Dyna-Corer’s cores, even though they were very wet - amazing!”*

# Dyna-Brush

The Dyna-Brushes are ideal for collecting aeration cores.

## Solutions...

- Collects dead grass, clippings and even pine needles from within the turf
- Sweeps up mini-cores and similar debris to leave a perfectly clean surface
- Contra-rotating action stands the grass up

**GreenTek®**

# Thatch-Away

**BOOK A DEMO**

**WATCH THE VIDEO**

# Every greenkeeper's essential "must have"

Thatch is the number one enemy of good putting surfaces. This layer of excess organic matter holds water, and therefore encourages shallow-rooted Poa Annua to dominate the turf. Thatch produces a surface that is soft and spongy when damp, yet quickly dries out and turns yellow at the first sign of a drought.

It is not by coincidence that almost all of the top golf courses in Europe use the Thatch-Away Supa-System.

Good news travels fast, and the Thatch-Aways' awesome ability to cleanly remove and collect up thatch has made them legendary.

Checking root-zone samples on each green reveals the extent of your thatch layer.

## FREE Storage Rack

If you haven't already got one of these smart storage racks in your maintenance facility, you ought to have!

Simply order two extra sets of cassettes and we'll give you this rack, **FREE OF CHARGE** with our compliments.

# The world's most effective thatch collecting verticutter

There is just nothing to compare with the Thatch-Aways' unique ability to cleanly cut out and collect up thatch. And on top of that, the way they leave the surface beautifully groomed and immediately playable.

But there's also much more that the Thatch-Away Supa-System will do - just as easily and effectively.

The Supa-System is the perfect partner for your greens triple mower, and maximises its usefulness like nothing else does.

**Have you got the full System yet, or are you still building yours up?**

Available to fit all popular greens mowers

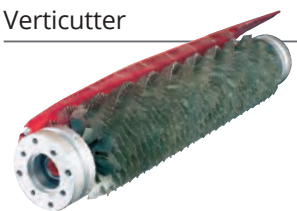

Thatch-Away - it does exactly what it says!

## Solutions...

- Complete triplex-operated greens maintenance system
- Saves huge amounts of man-hours and money
- Unmatched verticutting and collecting performance
- Improved turf texture gives faster green speeds
- Safe and secure cassette change. No tools needed

**GreenTek®**

# Cassettes for every task...

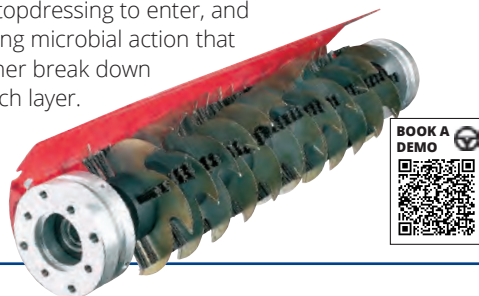

*“Our agronomist views them as essential equipment on every course”*

## Scarifier

### For a Thatch-Free Root Zone

Periodic use of the Scarifier Cassettes set at 8-12mm deep will **remove and sweep up enormous volumes of thatch from deep within your root zone**, enabling air and topdressing to enter, and promoting microbial action that will further break down the thatch layer.

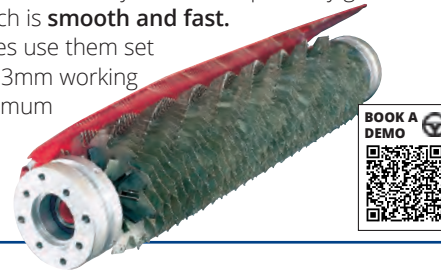

## Verticutter

### For a Thatch-Free Surface

With their revolutionary Fan-Force® Tungsten tipped blades spaced at just 10mm apart, the Verticutter Cassettes **will remove and vacuum up an incredible amount of thatch**. They leave an impeccably groomed surface which is **smooth and fast**.

Most courses use them set between 0-3mm working depth. Maximum depth is 6mm.

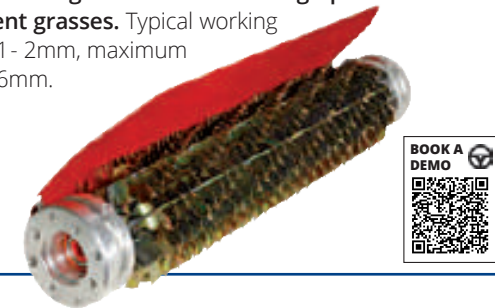

## Fine-Grass™

### For Fine Fescue and Bent

The Fine-Grass cassette has **ultra thin 1mm tungsten tipped blades** at 15mm wide spacings. Specially designed for **preventing thatch from building up in fine fescue and bent grasses**. Typical working depth 1- 2mm, maximum depth 6mm.

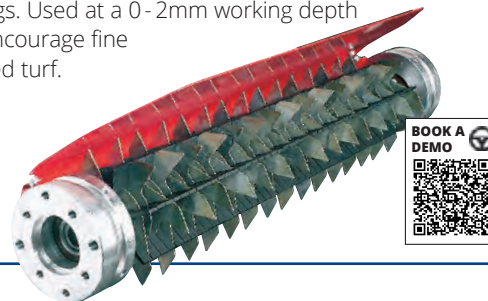

## Groomer/Poa Buster™

### For a Smooth Textured Surface

**To thin out and refine coarser grasses**, particularly Poa Annuua, the Groomer/Poa Buster Cassettes have specially thin blades with offset Tungsten tips that cut at just 5mm spacings. Used at a 0-2mm working depth they encourage fine textured turf.

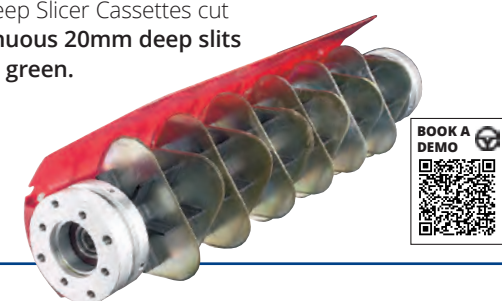

## Deep Slicer

### For Vigorous Roots & Growth

**To prune the grass roots stimulating vigorous new growth**, and to enable air to penetrate even deeper into the root zone allowing gas exchange to take place, the Deep Slicer Cassettes cut **continuous 20mm deep slits in the green**.

## Star Slitter

### For an Aerated Root Zone

The Star Slitter Cassettes mounted on your greens triple mower provide a **fast way of aerating to a depth of approximately 20mm**. The surface is left undisturbed and play can immediately continue.

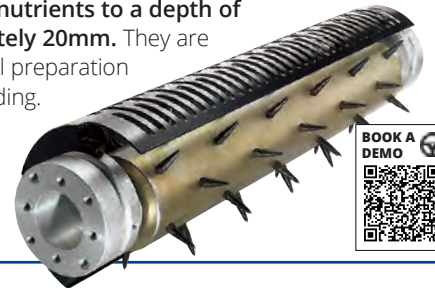

## Sarel Roller

### For a Surface That Breathes

To keep your turf growing strongly in **Summer or drought periods** when the surface tends to get sealed over, the Sarel Roller Cassettes **allow entry for irrigation water and nutrients to a depth of approximately 20mm**. They are also an ideal preparation for overseeding.

## Greens Roller

### For Faster Smoother Greens

A regular light rolling of your greens enables you to **maintain a smooth fast surface without mowing so close**. These solid steel roller cassettes fit straight into the Thatch-Away Supa-System units, providing you with a **highly effective greens roller for minimum expense**.

## Rotary Brushes

### For a Gently Brushed Surface

The **soft** black rotary brush cassettes are ideal for **removing dew, wormcasts and light debris** throughout the year. The **stiffer** blue version will additionally collect the coarser residues left **after deep scarifying, coring and brushing-in topdressing**.

## Bermuda Tamer™

### Keep Bermuda Healthy

Keeping Bermuda grass healthy and manicured is a **challenge**, but the Bermuda-Tamer cassette provides an unbelievably powerful way of keeping this aggressive grass under control. Thousands of high tensile steel bristles **give a superbly groomed surface and a smooth true ball roll**.

### For Evenly Dispersed Topdressing

The Topdressing Brush Cassettes **follow the contours of your greens to evenly brush-in your topdressing** without scraping it off the crowns and dumping it in the hollows like a dragmat does. They are also **ideal for standing up the grass** for an extra clean cut and the fastest ball roll.

# Micro-Groomer

NEW

# Discover Micro-Grooming

For those striving to maintain their greens to the very highest level, enter the new Thatch-Away Micro-Groomer!

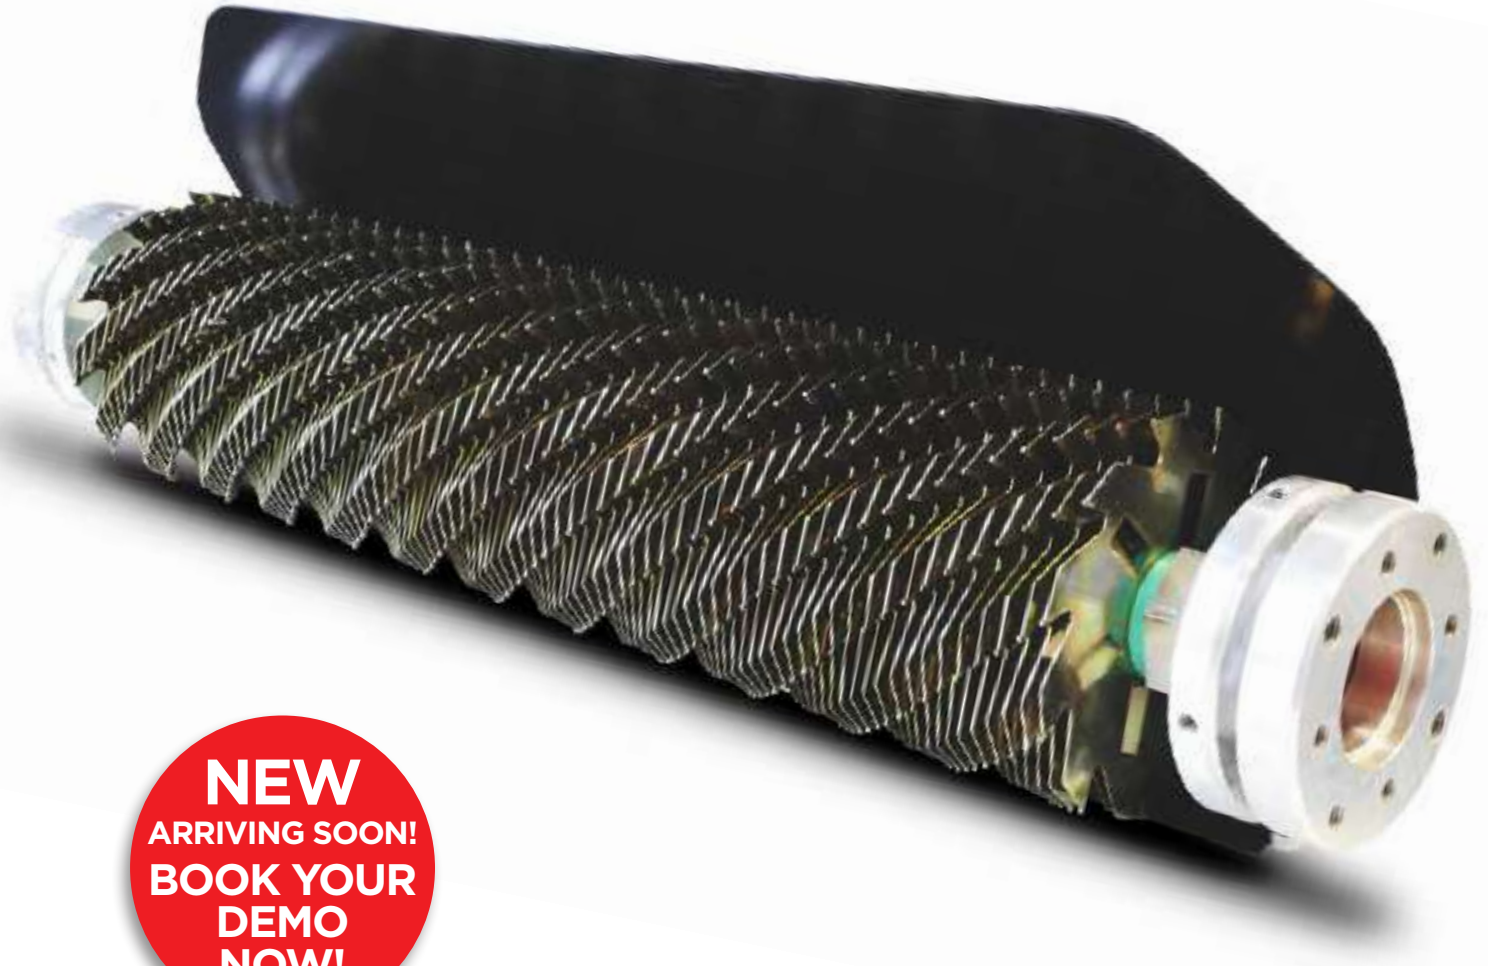

Micro-Grooming is not a verticutting or thatch removal operation. Think of it as ultimate sward refinement. The blades work in the upper leaf area of the surface to keep it fast and lean, with the finest possible texture

Building on the success of the existing Thatch-Away Groomer/Poa Busters, these new cassettes take grooming to a wholly different level. They are laser engineered with the finesse of a supercar, and have 210 blades per set, at just 6.5mm spacings, with ultra-fine 1mm tungsten tips.

A staggering total of 2310 of blade tips will groom your greens with a jaw-dropping 39,400 surgically precise micro-cuts per square metre!

This is micro grooming!

If you are looking to invest in the very latest turf improvement technology, ask for a demonstration of the new Thatch-Away Micro-Groomers. You won't be disappointed!

# Unique design features from the world leader

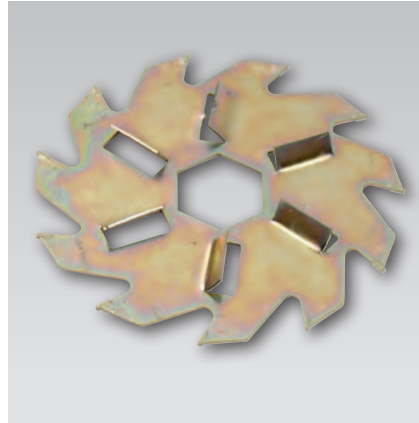

## Unique B.P.S. (Blade Protection System)

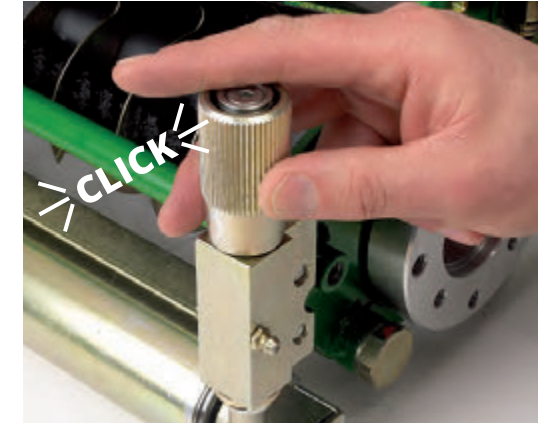

This is essential because although the Tungsten tips will withstand the most abrasive sand root zones, they can be easily knocked off when sliding the units sideways under the mower to fit them. The B.P.S. prevents this happening by using a two position rear roller which raises the blades right off the floor when not in use.

Tungsten tipped FanForce® blades.

Vacuum fan blade spacers Patented.

Unique **Set By Feel™** height adjustment.

Simple, safe and secure cassette changeover.

**NO** crawling under the greensmower

**NO** tools needed

**NO** bolts (to forget to tighten)...

So **NO CHANCE** of cassettes falling out on the green!

Patented

**GreenTek®**

# Thatch-Away Walk Behind

## Nothing comes close!

The Thatch-Away 24" and 30" Walk Behind Verticutters are designed to give you the highest performance available in any pedestrian verticutter.

This is achieved by the use of Fan-Force Tungsten tipped blades that create a powerful air vortex which literally sucks up the thatch from your green and blasts it into the grassbox, leaving a debris-free surface. Many other features set the Thatch-Away apart, including the precision manufactured rear roller with a true differential, and the rear roller scraper that incorporates a special trough to actually collect the debris it removes.

In addition, a quickly inter-changeable Brush Reel is available for the Thatch-Away. This is ideal for when you wish to give the surface just a gentle grooming, or to remove surface debris and Poa Annua seeds.

Ask for a  
**FREE  
DEMO**

Rear roller scraper trough collects debris as you go.

Tungsten tipped blades and finned spacers for ultimate cutting and collection performance.

Look at the finish - and all that thatch!

## Solutions...

- 605 tungsten tips work across the 24" cutting width for fast effective thatch removal
- Unique Fan-Force blade design literally sucks thatch out of the turf and blasts it right to the back of the grass box
- Powerful 5.5hp Honda engine for rugged reliability
- Complete with large capacity grass box

*“A very good machine. I was surprised at the amount of debris the machine picked up. We also bought the brush attachment and again this gave good results.”*

**BOOK A  
DEMO**

**WATCH THE  
VIDEO**

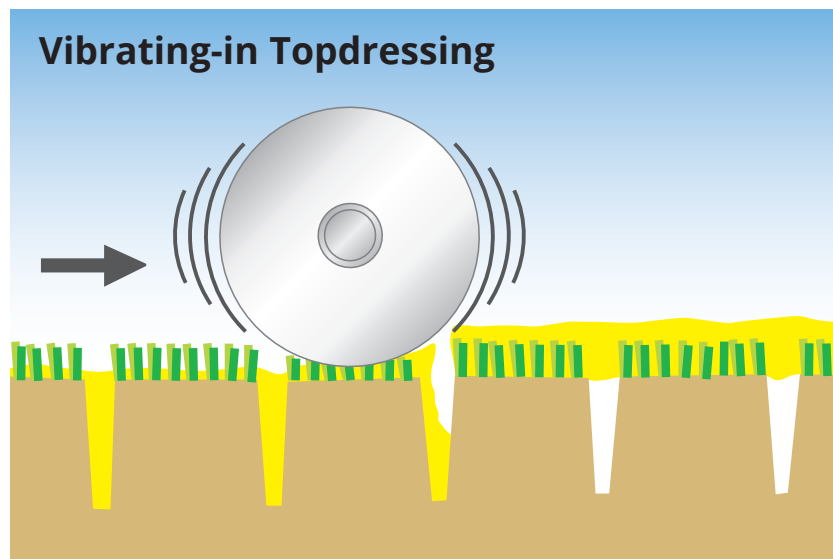

# The best greens rollers in the world

It is not just the fact that Select-A-Vibe rollers produce measurably smoother and faster greens than other types of rollers that makes them the best choice. They are the **logical choice** in **every** way.

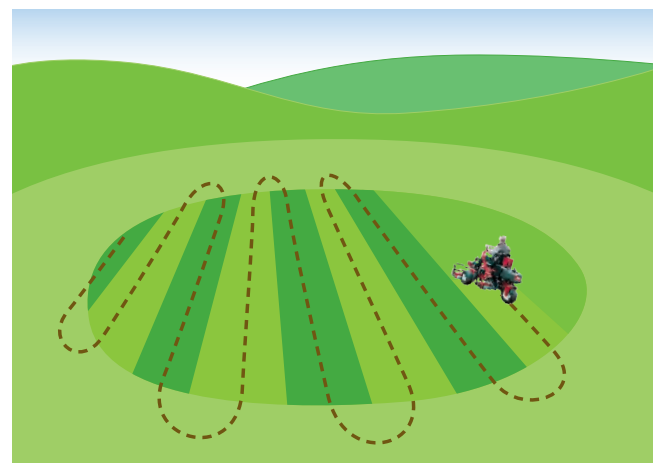

They are faster in use than other rollers, because they cover a full 1.5m (5') width. Their three individual 22" units follow contours, just like your mower does. And you drive them facing straight ahead, which means they leave straight stripes behind, and give you the assurance that all levels of staff can use them safely.

And they are **so easy** to use! You don't have to sit sideways and screw your neck back and forth as you zigzag from side to side across the green. You **don't** struggle for traction on wet slopes. And you **don't** have to hitch up to a utility vehicle to drive from one green to the next. Nor do you have to buy petrol for them, because they operate on your diesel greensmower.

On top of which you can also do so many other tasks with them because of their unique **variable** vibratory action...

There is nothing like a combination of drag brushing and vibratory rolling for filling your coring holes. And by getting the topdressing further down into the surface, you stop it blunting your mower's blades as much, dramatically reducing downtime and regrinding costs.

The three units follow contours and leave straight full-width stripes, just like your mower does.

## Solutions...

- Three individual 22" roller units
- Follow your greens' contours just like your mowers do
- Roll straight stripes that match your mowing width
- Quick to use and to transport from green to green
- Vibrate-in topdressing without bridging over coring holes
- The most operator-friendly greens roller available

Full 1.5m (5') rolling width enables you roll greens quick enough to keep ahead of the players.

**GreenTek**<sup>®</sup>

# Select-A-Vibe

BOOK A  
DEMO

WATCH THE  
VIDEO

# For consistently fast greens

**Do all your greens stimp at the same speed?  
They can do!**

The Select-A-Vibe rollers give you a unique advantage over any nonvibratory type of roller, in that their vibratory action enables you to even out speed inconsistencies between greens. By varying your speed of travel as you are rolling different greens, you can vary the vibrations per metre that you apply to each, and hence the effect.

Thus by rolling at a slower speed on a slow green, and faster on a fast green, the greenspeeds of both can be equalised. Wouldn't your golfers like that?

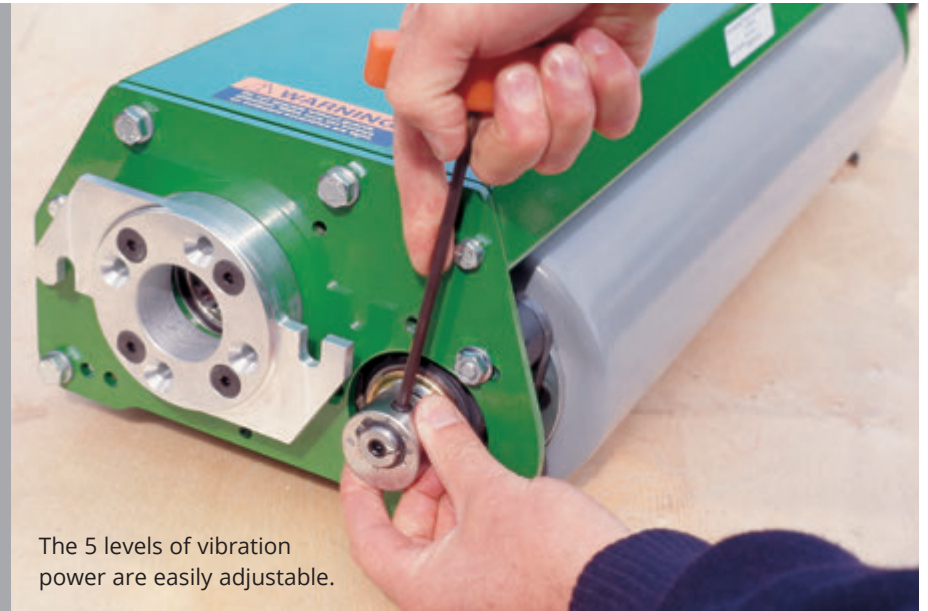

**Only Select-A-Vibe can do all this for you...**

## Vibration Power Levels

- 1 Establishing New Greens
- 2 Regular Rolling
- 3 Pre-Competition Rolling
- 4 Trueing Up After Aeration
- 5 Vibrating-in Topdressing

These suggested power levels are a starting point from which you can experiment and find the optimum settings to suit your particular greens conditions.

The 5 levels of vibration power are easily adjustable.

Select-A-Vibe rollers fit all popular greens mowers.

Select-A-Vibe rollers are available for both electric and hydraulic drive greens mowers.

**GreenTek®**

# Easy Load

WATCH THE VIDEO

## Save time and money

### Twice as fast...

Customers who own the Easy-Load topdressing trailer tell us that they can now topdress **“twice as fast, with half the manpower”**.

Now you can transport your sand and load it directly into your topdresser with no manual handling.

The massive 16" flotation tyres are spaced outside of the body which gives extra stability when you are tipping in the high position.

The Easy-Load is designed to be your ideal all-round three tonne trailer. It is equipped as standard with a dual-purpose tailgate which incorporates a flow control gate and a loading chute within itself, and is also top-hinged in the conventional way. This enables you to use the Easy-Load for general tipping trailer duties as well as loading your topdresser, thus giving you maximum value from your investment.

*“The Greenkeeper’s best friend.”*

BOOK A DEMO

Suitable for use with modern spinner type topdressers.

Wheels spaced outside body width provide extra stability for high tipping.

*“Best item of equipment I have ever purchased. It has taken hours off topdressing and bulk material moving. Easy to use for filling Cushman topdresser, freeing up two staff members for other tasks.”*

| Easy-Load (Patented) |  |
|----------------------|--|
| Unladen weight       | 850kg                                      |
| Load capacity        | 3 Tonnes                                   |
| Body volume          | 1.83 cubic metres (65 cubic feet)          |
| Body dimensions      | 2.47m (97") x 1.40m (55") x 0.53m (21")    |
| Overall length       | 4.45m (14'7")                              |
| Overall width        | 2.32m (91")                                |
| Tyres                | 400/60-15.5 10 ply                         |
| Brakes               | Hydraulic brakes plus manual parking brake |
| Optional Extras      | Road lighting and mudguards                |

## Solutions...

- Eliminates manual handling, in line with HSE -objectives
- Frees up manpower for other important jobs
- Speeds up topdressing so greens are back in play quicker
- Unique design with wheels outside of the body for maximum stability and safety

The Easy-Load can also be used as a conventional tipping trailer.

**GreenTek**

# Greens-Groomer Mk 2

BOOK A  
DEMO 

WATCH THE  
VIDEO 

*“It brushes the sand down into the surface instead of throwing it forwards.”*

# Simply brilliant!

## The ultimate towed brush for natural and synthetic turf

The Greens-Groomer, with its quadruple 'zig-zag' brush pattern gives unrivalled sand dispersion and topdressing performance.

Instead of throwing the sand forward to the edge of the green like a rotary brush does, the Greens-Groomer's 16 brushes work the topdressing down between the grass blades, right down to the base of the sward, and into your coring holes.

The Greens-Groomer avoids leaving tramlines, takes less passes, and saves bruising the turf.

Easy to use with any power unit, the Greens-Groomer is the effective way to get your greens back in play sooner!

**“16 separate brushes give unrivalled brushing-in and grooming performance.”**

Ask for a  
**FREE  
DEMO**

Towed or tractor mounted

Brushes sand down coring holes

## Solutions...

- Brushes-in topdressing sand - wet or dry!
- Does not bruise the turf
- Lifts grass for a clean-cut smooth textured surface
- Greens back in play sooner
- Removes dew before play
- Easy to fit, quick to use
- Drawbar position can be easily reversed to extend brush life

**GreenTek®**

# Greens-Groomer Synthetic

## Increase the life of your synthetic pitch

The Greens-Groomer has long been recognised as the most effective brush ever made for natural turf. Now that same experience is applied to Synthetic surfaces.

Very importantly, the Greens-Groomer uses a unique Patented brush pattern where all 16 brushes are positioned in random Quad Zig Zag formations. No other brush has this feature which is designed to prevent tramlines being left on the turf surface.

For Rubber Crumb filled pitches, the Rear Rake and Brush attachment uses no less than 84 spring fingers mounted in three staggered rows to totally groom your pitch. And each row of rakes is adjustable, so you can vary their intensity from just a gentle combing to a thorough raking.

Greens-Groomer with Rear Rake and Brush for rubber crumb filled pitches.

# Double the width

The 3.6m Greens-Groomer 12 doubles your productivity in one go!

The extra wings float to follow the contours of your greens, enabling you to quickly brush in topdressing or disperse dew over a full 12' working width however undulating your greens or fairways are.

The auto-lift system automatically raises the wings as the transport wheels are lowered, to save you getting off and doing it manually.

If you are already using a Greens-Groomer 6, why not fit the 12' upgrade kit and double your productivity?

*“Excellent.  
The best we’ve used.”*

# Greens-Groomer 12

Full 12' (3.6m) working width with automatic folding wings.

## Solutions...

- Twice as wide – takes half the time!
- Floating brush heads follow contours
- Auto lift saves getting off to fold brushes
- 6' to 12' upgrade kit available

**GreenTek®**

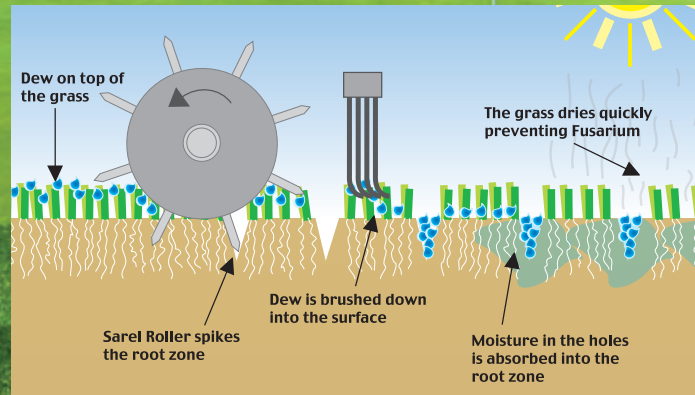

# Sarel-Roller & Brush

- ## Solutions...
- Thousands of small holes pricked through sealed turf surfaces
  - Decreased use of wetting agents
  - Brushing disperses moisture, reducing fusarium risk
  - Ideal for use before and after overseeding, to increase germination rate

## How to survive droughts and downpours

In summer, turf becomes sealed by a combination of dust and foot traffic. This results in the irrigation or rainfall evaporating off without being absorbed into the root zone. And when it rains hard, a sealed surface results in a mass of puddles.

Hence the benefit of using a Sarel-Roller to spike the surface followed immediately by a brush to sweep the dew down the holes into the root zone. Then when it rains, you will have an open surface that drains freely.

The Sarel Roller and Brush combination can help to significantly reduce your expenditure on wetting agents.

| Sarel Roller & Brush |           |
|----------------------|-----------|
| Working width        | 1.5m (5') |
| Weight               | 143kg     |

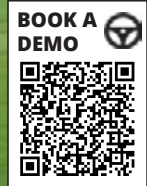

# Want to use your utility vehicle?

The GreenTek Multi-Mount is causing a huge shift in popularity towards using utility vehicles for greens maintenance work.

The Multi-Mount is a universal frame which can be configured to suit the Cushman Truckster, Toro Workman and John Deere Pro Gator. It enables you to attach the Aero-Quick, Maxi-Brush and Sarel-Roller to any of these power units.

Sarel-Roller and Multi-Mount on a John Deere Pro Gator.

Aero-Quick and Multi-Mount on a Toro Workman.

## Solutions...

- Durable heavy-duty construction
- Fits all popular turf trucks
- Interchangeable fittings for different models
- Takes a wide range of GreenTek equipment

**GreenTek**

# Maxi-Brush

## Solutions...

- Economical and versatile
- Turf is less prone to fungus when dew is dispersed
- 6 rows of bristles quickly brush-in topdressings
- Ideal for striping pitches, grooming before mowing and dispersing worm-casts and grass clippings
- Also suitable for maintaining synthetic turf

# The smart way to healthy turf

The importance of brushing turf is now widely recognised. It has largely replaced the use of dragmats as the best way of working-in topdressing, and is increasingly used to remove worm-casts and disperse dew, thus helping to prevent fungal diseases such as fusarium.

The Maxi-Brush is a triple section 5.4m (18') wide brush, which can also quickly adapt to a six row 1.8m (6') wide topdressing brush. Now with the introduction of optional hydraulic folding, it has become even more versatile than ever.

By brushing off the dew before mowing you get a clean cut with no grass clumps.

## Very versatile

One of the great features about the Maxi-Brush is its versatility. For general sportsfield use, the manual folding version is ideal. For golf courses, optional hydraulic folding provides ultimate ease and efficiency for transport between fairways.

And if you already own a Maxi-Brush, you can now also purchase the Sarel-Roller kit as an option to fit the same frame.

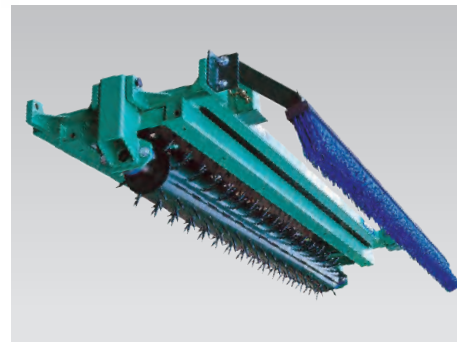

Can also be used as a six row topdressing brush.

Hydraulic Maxi-Brush folds up without leaving your seat.

*“We can brush all our fairways in 2 hours 45 minutes which allows clump free cutting.”*

Sarel-Roller Cassette with Rear Dew Brush fits into an existing Maxi-Brush frame.

| Maxi-Brush (Patented)                   |               |                 |        |
|---|---------------|-----------------|--------|
|   | Working width | Transport width | Weight |

# The double-jointed transformer!

With its massive 5.4m (18') working width the Multi-Brush can disperse the dew and worm casts off all the fairways on an 18 hole golf course in two hours! And its three independently floating heads with unique double-jointed lift arms enable it to flow over undulations like nothing else can.

Brushing the dew off your turf daily has a double benefit. Not only do the players appreciate a dew-free surface, but it also helps prevent fungal disease such as fusarium. Then you can follow straight over with your fairway mower, leaving an evenly dispersed cut without clumps of wet clippings everywhere.

And at the touch of a lever, the Multi-Brush effortlessly transforms itself into a supremely effective 1.8m topdressing brush.

Effortlessly transforms from 5.4m fairway brush to 1.8m topdressing brush.

| Multi-Brush             |                 |        |
|-------------------------|-----------------|--------|
| Working width           | Transport width | Weight |
| 5.4m (18') or 1.8m (6') | 2.1m (7')       | 240kg  |

The Multi-Brush is supremely effective for brushing-in topdressing.

## Solutions...

- Brushes off dew before mowing for a clean cut
- Reduces risk of fusarium
- Leaves beautiful stripes
- Brushes-in topdressing with ease
- Floats over undulations
- Folds hydraulically

BUILT IN BRITAIN

## Solutions...

- Three separate rollers follow undulations
- Hydraulic folding for quick and easy operation
- Fits to mid size compact tractors
- Quickly restores the surface of your pitches

## Fast, lightweight rolling

If you have a large area of turf that needs a regular light rolling, the Multi-Roller has been designed for just that! It has been specially developed to meet the needs of Football Academies and Sports Complexes with several pitches that require a regular light rolling to restore the surface between games.

Covering a massive 18' (5.4m) working width, and yet weighing only 650kg, the secret of its effectiveness is its small diameter rollers which give a greater rolling pressure for their weight than large diameter rollers would do.

Used in conjunction with just a mid range compact tractor, it is now possible to roll a full pitch in approximately 20 minutes!

Hydraulic folding

### Multi-Roller

| Working width              | Transport width | Weight |
|----------------------------|-----------------|--------|
| 5.4m (18')<br>or 1.8m (6') | 2.5m (8'2")     | 650kg  |

# The world's widest sarel roller

Sarel rolling has long been recognized as a highly beneficial turf treatment. It keeps the turf surface open, so that it can breathe and drain, and nutrients can be absorbed.

The Multi-Sarel has three separate units which fold out hydraulically to give a massive 5.4m working width. It can also be used folded in with all three rollers in line to give a very intensive spiking pattern. This is an ideal preparation for overseeding.

Rear brush attachments are also available so that you can spike and groom at the same time, leaving your pitches healthy and immaculately striped.

Optional rear brushes groom your turf while you spike.

# Multi-Sarel

Units can also be used folded in for intensive overseeding preparation

## Solutions...

- Keep your turf breathing and draining
- 5.4m working width
- Rapid coverage of large areas
- Also takes Multi-Brush and Multi-Roller units

### Multi-Roller

| Working width           | Transport width | Weight |
|-------------------------|-----------------|--------|
| 5.4m (18') or 1.8m (6') | 2.3m (7'6")     | 450kg  |

# Turf Conditioner 12

NEW

# The economical way to dethatch your turf

By giving your turf a good raking you can help to stimulate more healthy grass growth. Also to remove thatch, and lift the grass before mowing to prevent nap.

The Turf Conditioner is equipped with three rows of spring tines, each of which can be individually adjusted to achieve the exact degree of raking that you require. In addition, a stiff rear brush enables you to further groom the surface of your turf to leave it with a beautifully striped finish.

## Turf Conditioner 6

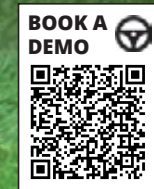

|               |           |
|---------------|-----------|
| Working width | 1.8m (6') |
| Weight        | 50kg      |

## Turf Conditioner 12

|               |            |
|---------------|------------|
| Working width | 3.6m (12') |
| Weight        | 155kg      |

# Turf Conditioner 6

## Solutions...

- Three adjustable rakes lift out thatch and debris
- Air can circulate around the grass better, reducing the risk of fungal disease
- Adjustable rear brush leaves a beautifully groomed and striped finish

**GreenTek**

# Bunker Drainer

## Your solution for flooded bunkers

One thing you can't control is the weather. If you have heavy rain on the night before your big tournament, what will your bunkers look like in the morning? It's at times like this that you'll be glad you've got a GreenTek Bunker-Drainer in your shed.

This pump means business! It is not just your conventional water pump with a suction hose that is difficult to get primed, and keep flowing when the level gets low.

The Bunker-Drainer's 5hp Honda engine drives a heavy duty flexible drive shaft, with a high volume rotary impellor pump mounted directly on the end of it. Because the pump is actually in the water it needs no priming, and can handle muddy water with ease.

The shaft driven pump quickly empties flooded bunkers, trenches or graves with no priming.

An additional drive shaft with a Vibrating Poker attachment is also available for concreting work.

| Bunker-Drainer |                                 |
|----------------|---------------------------------|
| Engine         | Engine Honda GX160 5hp          |
| Drive shaft    | 5.0m                            |
| Pump           | Heavy duty 2" submersible pump  |
| Hose           | 10m of 2" layflat hose included |

## Your economical solution for light brushing

If you want a quick way of dispersing dew or brushing in light topdressings, the 8' Greens-Brush is ideal for your needs. It comes complete with category 1 fittings, suitable for compact tractors and an optional spring loaded adaptor enables it to fit on Cushman Trucksters. It has tough polypropylene fibre bristles, and the brushes are long lasting and easy to replace.

# Double-Quick

*“One of the best machines I have come across”*

BOOK A DEMO 

WATCH THE VIDEO 

# Aerate, roll, rake and brush

Aeration is proven to restore the health of compacted sports turf. Light rolling is necessary to keep the surface smooth. Raking lifts out thatch and stands the grass up allowing better air circulation which helps to reduce the risk of fungal disease, and brushing disperses dew and leaves a smart striped finish.

If you've never had time to do all these vital treatments as often as you should, now's your chance to do them all in one go. Every time you aerate you can do all four operations with no extra manpower or time taken, thanks to the Double-Quick's all-in-one Rear Roller, Rake and Brush attachment.

**GreenTek**

# Double-Quick

## Solutions...

- Relieves compaction, allowing turf to breathe – and grow!
- Opens up the soil structure and improves drainage
- Stimulates deeper roots which resist drought in summer
- Encourages stronger turf that is less likely to scuff off in winter

# It's a Rollover !

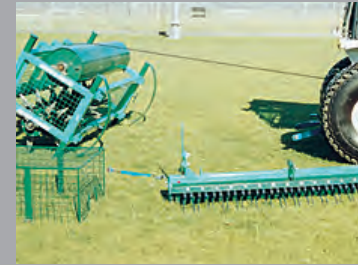

The heart of the system is the unique Main Frame, which can carry two attachments of your choice, mounted one above the other. So you can change from Deep Slitter to Ballast Roller etc by just turning the Main Frame over.

**1** Remove pins holding top guard and rear attachment.

**2** Attach tow cable to tractor and Double-Quick.

**3** Drive tractor forward to roll Double-Quick over.

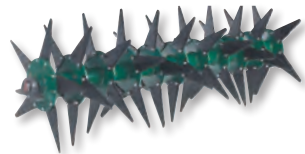

**4** Re-attach to tractor and replace top guard.

## Mix And Match Your Attachments To Suit Your Needs...

### Deep Slitter

With closely spaced 8½" tines, this gives a dense pattern of aeration for heavily used winter games pitches and fairways.

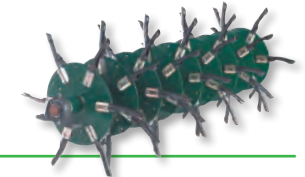

### Fine Slitter

Even closer spaced 5" tines – to prevent surface sealing and increase the absorption of air, water and fertiliser.

### Hollow Corer

The hollow corer removes plugs of soil, letting the ground expand and decompact.

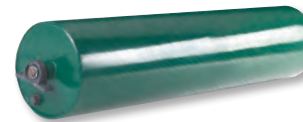

### Disc Slitter

The continuous slits give maximum air and water absorption, plus they prune the grass roots to stimulate vigorous new growth.

### Ballast Roller

Fill it with water for maximum effectiveness; use it part full or empty for a light rolling.

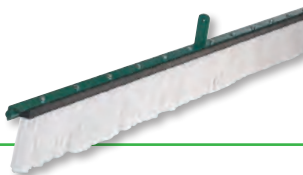

### Rear Roller

Great for firming back divots after slitting.

### Scarifying Rake

Fast effective thatch control, as you go. Attaches to the rear roller above.

### Rear Brush

Can also be attached to the Rear Roller, to leave a well groomed appearance.

### Double-Quick (Patented)

# Aero-Quick

BOOK A DEMO 

WATCH THE VIDEO 

# Grass roots don't grow in soil

Grass roots do not grow in soil, but in the air spaces between the soil particles. Compaction from regular play closes up those air spaces till the turf can neither breathe nor drain. Unless you relieve this compaction by regular aeration, the soil becomes stagnant and your turf will die.

The versatile Aero-Quick weighs only 240kg, making it light enough for even a Turf Truckster or 20hp compact tractor to handle. Yet with a full 5' (1.5m) working width, it will also cover the tracks of most tractors up to 35hp.

A wide range of different attachments is available to suit varying surfaces from golf greens to football pitches, and a built-in weight tray allows you to add further ballast for maximum penetration.

The hinged rear guard gives good access to the interchangeable attachments.

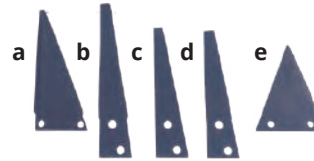

## Wide range of interchangeable attachments

### Slit Tinners

A wide range of different slitting tines from 5" to 8½" depths may be used on the Aero-Quick for maximum effectiveness on all types of sports turf.

- a:** 8½" Outfield
- b:** 8" Outfield
- c:** 6" Outfield
- d:** 6" Fine Turf
- e:** 5" Fine Turf

### Hollow Corer

This removes plugs of soil, enabling the ground to expand and decompact. The air channels thus created also assist in the breaking down of thatch.

### Disc Slitter

The continuous slits give maximum air and water absorption, plus they prune the grass roots to stimulate vigorous new growth.

### Rear Roller, Rake and Brush

Modular attachments enabling you to do up to four tasks at once.

The Aero-Quick's 5' (1.5m) working width covers the track of most compact tractors and utility vehicles.

## Solutions...

- Relieves compaction, allowing turf to breathe – and grow!
- Opens up the soil structure and improves drainage
- Stimulates deeper roots which resist drought in summer
- Encourages stronger turf that is less likely to scuff off in winter
- Fits to compact tractors or popular utility vehicles

**GreenTek**

# Low Loading Trailer

## Solutions...

- A totally versatile trailer system for all groundcare uses
- Superior fully-welded construction
- Hot dip galvanized for maximum durability
- Drive-in tailgate ramp is ideal for all kinds of small machinery

Optional 1" thick Rubber Floor Mat.

## The ultimate way to transport groundcare equipment

With their drop-down tailgates providing easy loading access, the Low Loading Trailers offer you an ideal means for transporting all types of groundcare equipment and supplies, with models available for both on and off road usage.

Besides transporting mowers, these trailers can be used for tasks as diverse as carrying divot mix or collecting leaves. A range of useful accessories is available, including a sliding divider and mower clamp which can be positioned wherever required.

### Standard Low Loading Trailer

|                 |                 |
|-----------------|-----------------|
| Body dimensions | 152 x 99 x 43cm |
| Overall width   | 162cm           |
| Load capacity   | 400kg           |

### Super Low Loading Trailer

|                 |                  |
|-----------------|------------------|
| Body dimensions | 200 x 122 x 43cm |
| Overall width   | 184cm            |
| Load capacity   | 600kg            |

## Use GroundGuards to protect your turf

GroundGuards is a separate department within the GreenTek Group which specialises in the sale and hire of ground protection trackways.

A wide range of different trackway systems enables GroundGuards to provide solutions for the whole spectrum of turf protection requirements, from pedestrian walkways through to heavy plant access. The following are some of the most popular products within the range.

**FastCover PLUS** – these 1.2 x 0.6m mats interlock together to provide a trip-free surface, ideal for temporary walkways and marquee flooring.

**MultiTrack** – an extremely versatile 2.44 x 1.22m mat system, with a Roadway Tread on one side, and a Walkway Tread on the other. Extremely strong and durable, making them a great investment for golf courses and landscapers.

**MaxiTrack** – a heavy-duty bolt-together system for more demanding access requirements. Mats are 1.8 x 0.9m but weigh only 40kg so are easily installed by hand.

**XtremeMat** – these massive 4 x 2m mats provide the ultimate rigidity for supporting very heavy plant, or for making access roads for longer term projects.

**Please contact the GroundGuards customer support team directly on 0113 267 6000 for helpful advice on which system would best suit your requirements.**
